

Projector Ceiling Mount

Beam Up USA is a leader in mounting solutions. By providing high quality mounting solutions, and a strong focus on customer service, Beam Up USA ensures that each customer will be satisfied with their product.

Projectors tend to generate a lot of heat, especially with the new technology. If wrong mount is used, heat can be trapped and it can prevent your product from cooling, and therefore can cause for uncalled repairs and replacement of certain parts on your projector.

All of our products are built by using the best quality materials. We have engineered them in a way so that they will not do any harm to your projector. We don't go cheap on our products, but we tend to keep the product prices fair. Our business motto is to provide the best possible product and service for a fair price.
